

Saucony kinvara size guide

I'm not robot!

Saucony kinvara specs. Do saucony kinvara run small.

In this article, I'm going to answer the question: do Saucony run small or true to size? If you do not have the opportunity to go and try on your favorite Saucony running shoes in person and want to order them online, then this article is for you. Related: How do Saucony shoes fit compared to Nike or New Balance? Please check this running shoe size comparison between brands guide. Let's dive right in... Saucony Endorphin Pro Is the Saucony Endorphin Pro true to size? Yes. The Endorphin Pro runs true to size. I don't think I would want to go a half size down even though it's a racing shoe. The toe box is a little snug but pretty much spot on. Also, the length of the shoe is good. Related: Asics Metaracer vs Saucony Endorphin Pro Purpose I would love to race a marathon or a half marathon in it. It's for someone who's looking for a carbon fiber plate racing shoe with some higher durability predictions. If you want to buy one shoe for the next 6 to 9 months to train in and do time trials in, the Endorphin Pro is a great option. Weight: Women's size 8 (6.7 oz / 190g) Men's size 9 (7.5 oz / 212g) Drop: 8mm Stack height: 35mm in the heel, 27mm in the forefoot. Related: Saucony Endorphin Pro vs Nike Vaporfly Next% Saucony Endorphin Speed Is the Saucony Endorphin Speed true to size? Yes. The Endorphin Speed runs true to size. This is the middle-of-the-road running/racing shoe from Saucony. It fits true to size with no issues at all. It's definitely not a narrow fit through the forefoot and there's plenty of room in the toe box. Saucony nailed the upper and the breathability and the shoe has no heel slipping. The Endorphin Pro and Speed are two of these best 8mm drop shoes. Purpose The Endorphin Speed has a lot of stack height and so therefore can knock out two for one, a long run and tempo day shoe. If you're looking for an affordable half marathon or marathon racing shoe, the Endorphin Speed is your shoe. Weight: Women's size 8 (6.8 oz / 193g) Men's size 9 (7.8 oz / 221g) Drop: 8mm Stack height: 33mm in the heel, 25mm in the forefoot. Related: Saucony Endorphin Speed vs Pro (aka, the training Speed vs Racing Pro) Saucony Endorphin Shift Is the Saucony Endorphin Shift true to size? Yes. The Endorphin Shift runs true to size. This is a neutral maximalist road training shoe. It has an engineered sandwich mesh upper. This means there are two layers of mesh that make up the upper that are working together to create a lockdown feel but also not making it too thick so that you have enough breathability. Purpose It's a great option if you like a higher stack height with little to no ground contact feel but want a shoe that does not feel too mushy underfoot. I can put it in that middle-distance/long-run trainer category. Weight: Women's size 8 (9.3 oz / 263g) Men's size 9 (10.4 oz / 294g) Drop: 4mm Stack height: 38mm in the heel, 34mm in the forefoot. Related: Do Asics Run Small or True To Size? Saucony Triumph 18 Is the Saucony Triumph true to size? Yes. The Triumph runs true to size. This is a very plush neutral road running shoe. It fits true to size, but the toe box might feel a little wide for narrow feet. If you have a wider forefoot, the toe box is going to work really well for you. It has a jacquard mesh upper that's really comfortable but not very breathable. It has a very lockdown feel. Purpose I would most likely use it as an easy-day or daily trainer shoe. If you love a plush, plush, plush shoe, and you don't mind the weight and you just want to put miles in every single day, the Triumph will last you a long time. Weight: Women's size 8 (9.3 oz / 263g) Men's size 9 (10.4 oz / 294g) Drop: 4mm Stack height: 38mm in the heel, 34mm in the forefoot. Related: Saucony Triumph vs Hurricane Saucony Triumph vs Ride Saucony Ride 13 Is the Saucony Ride true to size? Yes. The Ride runs true to size. This is a neutral shoe. The jacquard mesh upper isn't narrow through the midfoot and it's plenty wide through the toe box. It's a very plush shoe with an incredible amount of cushion through the tongue and heel collar and great lockdown. Related: Do Mizuno Shoes Run Small or Big? Purpose It's a day trainer. I'm not going to say an easy-day shoe is because of that weight. If you need a gentle stability shoe that just gives you a little more support through the gait cycle but you don't want a true stability shoe, the Saucony Ride 13 could be the option for you. But if you want a stability shoe with similar cushioning and comfort, go for its sister, the Saucony Guide. Weight: Women's size 8 (8.8 oz / 243g) Men's size 9 (9.9 oz / 280g) Drop: 8mm Stack height: 28mm in the heel, 20mm in the forefoot. Related: Saucony Ride vs Brooks Ghost - Two Great Daily Running Shoes Saucony Kinvara 11 Is the Saucony Kinvara true to size? Yes. The Kinvara runs true to size. The upper is absolutely spot on with no heel slipping at all through the heel counter. The Kinvara 11 is a definitely neutral road running shoe with very minimal overlays. Purpose It's going to be a tempo-day shoe for how lightweight it is. It could be an easy-day shoe, but it's not a long-run shoe because there's not quite enough midsole protection. Or, if you're looking for a shoe to protect your legs in 5k or 10k meaning you're tuning up for a half marathon, this could be a shoe for you. Also, the Kinvara 11 could be an affordable half marathon racing shoe. I think the stack height is enough protection or the half marathon distance for your legs. Weight: Women's size 8 (7.8 oz / 221g) Men's size 9 (6.9 oz / 195g) Drop: 4mm Stack height: 23mm in the heel, 19mm in the forefoot. Related: Glossary of Running Terms Saucony Hurricane 23 Is the Saucony Hurricane true to size? Yes. The Hurricane runs true to size. The toe box is not too wide nor too narrow. It's not incredibly plush like the Hurricane 22 but very comfortable with outstanding lockdown. Purpose If you need a little help with overpronation but you don't

want a stability running shoe that is crazy stiff, like the Hurricane, is definitely your classic stability daily trainer. I would use it for a long run if I was not concerned about pacing as much because it's very heavy. Weight: Women's size 8 (9.8 oz / 278g) Men's size 9 (11.4 oz / 323g) Drop: 8mm Stack height: 33.5mm in the heel, 25.5mm in the forefoot. Related: Saucony Hurricane vs Guide Saucony Guide 14 Is the Saucony Guide true to size? Yes. The Guide runs true to size. The upper is super comfortable straight out of the box with no hot spots. If you have a narrow ankle, you're going to use the last eyelet at the top to lace it a little bit tighter because the opening of the shoe is a little bit wide. This has been a long-standing stability shoe from Saucony. The stability comes from the new Guidance Frame that runs through the upper and the seamless TPU medial posting. Purpose The Guide remains to be a really great shoe for long runs or recovery days and the PWRRUN midsole reflects that. Weight: Women's size 8 (9.6 oz / 255g) Men's size 9 (10.5 oz / 283g) Drop: 8mm Stack height: 34mm in the heel, 26mm in the forefoot. Related: Do Hoka Shoes Run True To Size? Hoka Sizing Chart Saucony Liberty ISO 2 Is the Saucony Liberty ISO true to size? Yes. The Liberty ISO runs true to size. This is a responsive performance trainer with a hint of stability, support, and energy return. It can also be great for neutral runners because the medial posting can be really helpful at the end of a run when your legs are tired and your ankles start to roll inwards. Purpose It offers a quick and versatile option for anything from up-tempo runs to daily training. Weight: Women's size 8 (8.4 oz / 226g) Men's size 9 (9.8 oz / 255g) Drop: 4mm Stack height: 23mm in the heel, 19mm in the forefoot. Related: Do Brooks Shoes Run Small or Big? Brooks Shoe Size Charts Saucony Freedom 3 Is the Saucony Freedom true to size? Yes. The Freedom runs true to size. This is a neutral shoe with a hint of stability and a fantastic toe box. It's not quite as stable as a stability shoe but not quite as loosey-goosey as a regular neutral daily trainer. It has a PWRRUN+ midsole, which makes for a very squishy and springy ride where longer runs and easier paces are really comfortable. Also, it weighs in at the weight of a daily trainer. Purpose It can certainly soak up the miles but has the agility for a wide variety of types of runs. You can certainly put in your long runs or even your marathon efforts. I didn't like it for speedier stuff, I liked it at my daily training effort or even slower for recovery runs or very long runs. Weight: Women's size 8 (7.7 oz / 198g) Men's size 9 (8.5 oz / 226g) Drop: 4mm Stack height: 23mm in the heel, 19mm in the forefoot. Related: Best Running Shoes for Speed (Saucony, Brooks, New Balance, Asics, Adidas) So, there you have it. As you can see, Saucony is a really great company that makes really great uppers that run true to size for nearly every model they have. If you've ever had an issue with Saucony sizing, please tell us your experience down below in the comments section. Until then, stay safe Related: How To Better Fit Bigger Shoes Saucony shoes are typically reported as true-to-size, especially when it comes to the brand's running shoes. However, you can't always be 100% sure as various models and even certain sizes can run larger or smaller than expected. Knowing your actual foot measurements can help a lot in determining the right Saucony shoe size for you. Especially if you've never measured it before. Saucony shoe sizing compared to other brands Saucony's men's sizing scheme appears to be consistent across a number of popular brands like Brooks, Asics, New Balance, and Hoka. Mind that you may need a bigger size in Nike and Adidas and a smaller size in women's Saucony models. Foot length (mm) Saucony Brooks Asics New Balance Hoka Nike Adidas Men's US sizes 260 8 8 8 8 9 9 270 9 9 9 9 10 10 280 10 10 10 10 10 10 11 11 Women's US sizes 230 5 6 6 6 6.5 6.5 240 6 7 7 7 7.5 7.5 250 7 8 8 8 8.5 8.5 If you are wondering how Saucony compares to the brands not mentioned in this section, see the brand size converter tool at the bottom of the page. How various Saucony shoes fit The brand's running shoes have a good reputation for their comfortable, well-fitting uppers and true-to-size fit. You can be sure that a daily trainer from the Triumph, Kinvara, Guide, Ride, or other popular collections will have a secure fit with an accommodating toebox. Even the more speed-oriented options like Endorphin Speed and Endorphin Pro are described to have a close-fitting yet not restrictive fit. Mind, however, that they will have a slightly narrower toebox. As for the casual sneakers from Saucony, the variety of designs can translate to differences in the fit. That's why we gather all available feedback from the buyers and experts about the fit and sizing of each individual model on its respective product page. Unisex sizing in Saucony A number of Saucony sneakers are unisex and are based on men's sizes. Women should subtract 1.5 from their regular US size to get the correct one in unisex shoes. Saucony comes in wide options The current selection of running shoes is available in the following widths: 36% of shoes come in wide 3% in extra wide If you have a shoe from another brand that fits you perfectly, you can enter its brand name and size into the converter below to find out its Saucony equivalent.
